Richwood

Richwood, July 26.- Theodore Moore and children visited with Mrs. Jhon Moore Sunday afternoon.

Mr. and Mrs. Mal Powell, of Newark, N. J. are spending two weeks with Mr. and Mrs. Bascom Powell.

Esmond Pugh and two sons, Buddy and Tom were the guests Sunday of Mr. and Mrs. T. T. Woolridge and daughter, Marvis.

Mr. and Mrs. Willie Mann were in Lynchburg on business Saturday.

Mrs. J. E. Wooldridge was the guest Wednesday evening of Mr. and Mrs. D. A. Pugh.

Mrs. Henry Fleshman visited with Mrs. D. A. Pugh Monday afternoon.

Miss Marvis Wooldridge is ill at this writing.

Thomas Guill and son, Duvall, were in Lynchburg on business Saturday.

Mr. and Mrs. Lynn Powell, of Roanoke are spending some time with Mr. and Mrs. Nathan Powell.

T. T. Pugh and son, Lynn, of Lynchburg were the week-end guests of Mr. and Mrs. D. A. Pugh.

Mrs. Annie Powell visited with Mr. and Mrs. Nathan Powell last Wednesday afternoon.

Mr. and Mrs. M. W. Pugh, of West Virginia were the week-end guests of Mr. and Mrs. D. A. Pugh.

Illinois Governor Vetoes Bill Banning Roving Cats

SPRINGFIELD, ILL.—Gov. Adlai Stevenson has vetoed a bill to curb delinquency of cats.

The state of Illinois, he said, has "enough to do without trying to control feline delinquency."

The bill would have permitted any person to capture cats running at large anywhere in the state and turn them over to police. Owners would get their pets back by paying a $1 fine.

Stevenson steered a neutral course between cat fanciers and bird lovers in explaining the veto.

"The problem of cat versus bird is as old as time," the governor said. He vetoed the bill "not because I love birds the less or cats the more."

He warned that such a law might become a dangerous precedent.

"Who knows but what we may be called upon to take sides as well in the age old problem of dog versus bird, bird versus bird, or even bird versus worm?" Stevenson asked.

He said it is "in the nature of cats" to do some unescorted roaming."

Printing from movable type was done in China in 1041.

The python swallows whole animals the size of small pigs.

The 1928 Olympic games were the first to include women's athletics.

Soap Holes Found Value in Disguise

Produce Magic Mud With Multiple Uses

Ever since Belle Fourche, S. D., was a rip-snorting town known at the end of the old Chisholm trail its residents have been damning the "soap holes" that plagued the area.

Fast-riding cowboys often took a nasty tumble in this super-slippery mud and cattle were forever getting bogged down in them.

But now, like a man discovering his hives are really a blessing, Belle Fourche has found its soap holes are one of its biggest assets.

Every one of them is filled with a magic mud called bentonite. It's a non-abrasive, tasteless, soapy mud with a thousand uses and scientists are thinking up new ones every day.

Most of us already are using it a half dozen times a day, but almost nobody has heard of it. Men use it in shoe polish and hand cleaners. Women use it in face

Bentonite is the most absorbent material found in nature. When moistened it swells to several times its normal size. This quality makes it useful in waterproofing housing foundations and many other industrial uses.

powder, lotions, beauty cream.

Bentonite also is found in many types of paint, plaster and cleaning agents. It's handy for filling holes in giant dams and for casting moulds for molten metal. Forced down thousands of feet into the earth this magic mud lubricates the drills in oil wells and sends the debris up to the drillers.

Its new uses and increasing popularity for its older uses all add up to a boom such as Belle Fourche hasn't seen since the gold rush.

In the past 10 years the population has practically doubled and bentonite now pours $600,000 a year into the town in the form of additional purchasing power.

Fifteen years ago Belle Fourche shipped out three carloads of bentonite. Last year its production was 6,137 carloads and this year they expect carloading to go considerably higher.

Scientists say that bentonite, a strange mixture made up mostly of dust from prehistoric volcanoes, is found almost nowhere in the world except in the Black Hills of Wyoming and South Dakota.

It is the most absorbent material nature ever has devised, they say, and a half dozen teaspoonful will soak up a glass of water.

Bond Price Chart

AMOUNTS OF VARIOUS FARM PRODUCTS REQUIRED TO BUY A 1950 SERIES E SAVINGS BOND AT COST PRICE OF 1750

PRODUCT	1933	1936	1949
Hogs, 200 lb.	112	60	70
Cattle, 1000 lb.	18	10	4
Milk, cwt.	586	446	173
Eggs, doz.	176	104	60

Potatoes, bu.	1,974	1,076	426
Apples, bu.	1,229	1,172	233

Based On Average Prices Received By Farmers

The above chart shows the almost unbelievable increase in the value of farm crops in the past 17 years, as depicted in a comparison of how much farm produce it takes now to buy a $1,000 government savings bond with how much it would have required in 1933.

Insect Killers Made By Synthetic Means

New pyrethrum-like chemicals that kill insects have been made synthetically for the first time in the laboratories of the bureau of entomology and plant quarantine, it has been announced by the U. S. department of agriculture.

The chemical makeup of the synthetic materials is almost identical with that of the insect-killing principle in pyrethrum, according to the chemists.

SCRIPTURE: PSALM 34:4-10, DEVOTIONAL READING:

God Can Be

Lesson for Ju

EVEN if you do not [illegible] this lesson, it is a good thing to learn by heart. The Psalms of Trust was selected for your use. They are far too fine to be in one column.

* * *

Who Can Trust Him?

PSALM 34:16-22.)

[illegible] has a right to trust. Those who do not know Him do not love him, who try to break down and corrupt those who do believe in him — these need not expect nothing at his hand. But there are three classes of persons who are encouraged to put their trust in God. One is the "contrite," the repentant, those who sincerely wish to be free of their sins—these can trust God for forgiveness. They cannot trust God to do anything else. Then there is the Psalmist calling on the right to trust in God.

If that word were perfectly and always people, it would be out. But in the Bible as a whole it are those whose desire is to love and

Their service is imperfect, love is far from perfect, man is without sin. We say with Peter, "Lord, thou knowest that I love thee." We have a right to trust in the broken-hearted man in him. Whoever gives your heart. God will not great Mender of hearts. He comforters; but the only God can

Why Trust God?

PSALM 37 gives one opposite of trust is worry never did any good. Worry eats into the nerves, light, gives no answers to problems, worry makes things worse. Then the writer of 30 gives another reason why he had tried it. If trusting is only a doctrine of men, a theory of preachers, a people would take it with a

Trust is really power, a kind of contagion that to heart. If there are people who know what it means, it is because they have known have learned much to themselves.

It would be a wonderful thing to most churches if they had "cell" of people who really agree to trust God every

* * *

When to Trust in God

ONe of Dicken's characters used to make a point of being cheerfully most un-cheerful of men. Anybody can be jolly when thing is lovely, he said, but credit in not worrying when nothing to worry about. So the writers of the Bible who trusted in God, not only in life. Read Psalm 46, for it gives a picture of life like ours of today, of foundations, torn by earthquake, late, discouraged world sense to trust only in the skies, religion would be long ago.

* * *

For What Shall We Trust God?

NO ONE PSALM and no truth in one notable read Psalm 91, for example, self. It would seem to you trust in God you must a violent death, nor at but too many saints of Lord himself had died violent deaths, for all Psalm 91 in that way. God does not mean by long life. It means he strength to match our

It does mean he all we need. It does shall be shielded from les. It does mean that from troubles that we can hear. It does that in this life we wholly free from pain; It does shall have strength souls (Ps. 138:3).

Which is the greater a weakling wearied by weight, or to be one who letes, able to bear the world can pile on?

Ten-Year-Old Youngest 'Ham' In Radio World

PHILADELPHIA. — Jane Bieberman is as tiny as an average 10-year-old. But when it comes to radio, Jane is a real grownup—and the youngest radio operator in the country.

Jane doesn't like to take too much credit for her accomplishments. After all, her daddy is a math teacher and one of the best known amateur radio operators in the Philadelphia area. He taught her all she knows.

But according to her father, Jesse Bieberman of suburban Cynwyd, it's a different story.

Wanted to Learn

"Jane wanted to learn to be a ham," he said. "She's a bright youngster and likes everything. She's full of pep. She likes to read, likes her Girl Scouts and her piano, and she likes school."

Tiny Jane, eldest of three sisters, took an active interest in radio when she was 6 years old. She wanted to know how to copy the code as it came, dot-dashing through her daddy's receiver.

So, the lessons began. When her father left for the army, she had learned to copy five words a minute.

The radio training fell off. When daddy came back there was more important things than radio to talk about at first.

Last spring, Jane decided she wanted to take up her radio studies again. She and her father went to work. To pass the examination for an amateur operator's license given by the federal communications commission, she had to copy 13 words a minute and answer many technical questions.

Passed Examination

Jane and her father went to the customs house and Jane took her examination.

"She was very confident," said Herbert Lipson, the FCC man who gave her the test. "If you didn't look at her and see how small she was, you'd swear she was a grown-up.

"I asked her if she was nervous and I told her our testing machine that sends out code on ticker tape would probably make her nervous.

"'Oh, no,' she said. 'My father has one just like it. I used to practice on it.'

"Her father went out and she took the test. She filled out her application all by herself, turned in the test and said she hoped it turned out satisfactory. The entire exam took about two hours and she went through it like a veteran operator.

"The only thing that seemed to disturb her was her math. She said her father had given her special training and she was concerned about whether she'd know the answers to the stock questions."

Six weeks later, Jane received her "B" amateur radio license. That made her eligible to transmit and receive certain frequencies.

Girl Who Was Going Blind Now Cuba's Top Ballerina

HAVANA, CUBA. — Once the doctors said Alicia Alonso, Cuba's great ballet dancer, was going blind.

Now she heads one of America's greatest dance organizations and is a darling in her own country. She dances so beautifully that anybody can enjoy ballet.

She got her big break last year when ballet hit a slump in New York City. Out of a job, she organized her own company, brought it to Cuba, and was a tremendous hit.

Now the Cubans are talking about endowing her. A popular movement is under way to raise funds to finance her shows in other nations as "Cuba's greatest ambassadress of culture."

'Help-Yourself-Designs' Aid Hospital Facilities

BOSTON.—Trustees of the Peter Bent Brigham hospital have completed negotiations for the installation of 32 "minimal" private room units designed especially for the institution.

The units resemble pullman car roomettes and encourage the patient to do as much as he can himself. Adjacent to the head of the bed are facilities for controlling daylight and artificial illumination. Equally handy are a bedside table, drawers and cabinet, and a two-way communication system with the nurse's desk in the corridor.

The designers are Frederick E. Markus and Paul F. Nocka, graduates of the Massachusetts Institute of Technology. They spent a year in research, visualizing themselves as patient, nurse, doctor and janitor. Occasionally, they used stop watches to check on time in performing various services for patients.

As a result, medical and nursing executives of the hospital believe that much of the present-day nursing routine will be unnecessary. The trustees voted to use a privately raised fund of $250,000 to go ahead with the project.

Psychiatry Employed In Choosing Names For New Products

CHICAGO. — Picture a business executive reposing on a couch in a psychiatrist's office.

He may be choosing a new brand name for his products.

Because, says a new study of 637 brand names, the psychological method is one of the best ways of choosing your brand name.

It used the word association test developed by psychologists to uncover the mind's hidden problems. You simply repeat the associations suggested to you by a word given by the psychologist. Your answer gives him clues to what's wrong with you, if anything.

Now the method has been adapted to discover what, if anything, is wrong with brand names. The study, made by William Archer Jr., of the Robert N. McMurray Co., management experts decided there is much wrong. Here are the findings:

Of the 637 names involved in the study, "only 12 per cent were found to contribute materially to the sales appeal of the product.

"Of this 12 per cent—or 76 names—six names had been selected by what appeared to be chance or sheer good luck. Another 24 names were selected through use of a previously successful company or brand name, and 46 were selected by using most or nearly all the methods" recommended in the study.

Radio Plays Cupid Role In U.S. Employes' Romance

BOULDER CITY, NEV. — "Love at first sight" is the popular way of beginning the "they lived happily ever after" story.

Two government employees, Bill O'Bannon and Kodie Lloyd, pulled a switch on that line, though. They fell in love "at first hearing."

O'Bannon is an engineering boss of a reclamation bureau crew far up the Grand Canyon, while Kodie operates the short-wave communication system of the bureau here.

She sends out routine messages to the bureau's field groups. When Bill first heard them he knew it was love. He passed his days off romancing and the couple were married.

They honeymooned in a "postman's holiday" fashion—at the Grand Canyon.

Police Burglars Leave House When Their Mistake Learned

NEW YORK, N. Y. —A big gentleman and a little gentleman entered Harry Zack's Brooklyn apartment. Both had guns. They said they were sorry for the intrusion but:

"We were told you're in the jewelry business."

"No, I'm not in the jewelry business, and I don't have any jewelry," Zack said.

Zack, 35, is a brokerage clerk.

"But we were told you got jewelry," the large bandit said, politely.

Zack said it wasn't so. Then they took his wallet. It contained $60.

"That's rent money," Zack protested.

"OK, we don't fool with this small stuff," the small man said.

The big man gave the wallet back.

Then they waved their guns at Mrs. Zack, 32. The large man took her engagement and wedding rings and her wrist watch.

"That's all we got," Said Zack. "Why take it?"

"Give it back to the lady," said the little man.

The big man gave it back.

"Sorry, but we made a mistake," the small gentleman said. "We were informed you were in the jewelry business."

Both bowed their way to the door.

"Do you want us to apologize?" the large man asked.

"Oh, no, that's not necessary," Zack said.

The big man left.

"Sorry to inconvenience you folks," said the little man leaving.

"Don't mention it," said Zack.

Professor Solves Problem Of Chickens in Dormitory

MIDDLEBURY, VT.—Peace and quiet have returned to the Middlebury college campus because of Prof. Hermann Wiederhold.

Prof. Wiederhold has a farm outside of town—just the place for 400 cheeping chicks that have been raising hob with dormitory and classroom dignity.

The commotion began when Robert B. Corcoran, a student from Southboro, Mass., decided to have fun at the expense of a fellow student, Barbara Baker of Wyomissing, Pa.

Corcoran asked a mail order house to ship 100 baby chicks to Miss Baker's dormitory room. He didn't specify what kind of chicks, so the mail order house contacted Miss Baker.

She learned of Corcoran's gag and switched the play. The mail order house sent Corcoran 400 Rhode Island Red chicks, instead.

They were practically in everyones hair until Prof. Wiederhold mentioned his farm.

Colored Dots

A large crowd attended the annual revival services at the Jordan Baptist Church on last Sunday at an all day meeting. The Pastor, the Rev. H. G. Hendricks preached the morning sermon end the Rev. Mr. Jones preached at the evening services. Rev. Lawing began the week of services at the 8 P. hour. The offering during the day was $93.00.

The Hasting Baptist Association will hold it annual meeting with the New H... church this weekend.

A large crowd attended the regular preaching services at Promise Land Church Sunday morning. The church choir rendered special music. Miss Betty Lou Flood served at the piano. The offering was very good. A special offering of $11.00 was taken for brother Anthony Hancock, who has been sick for some time.

All members of the Galilee Baptist Church are reminded of the annual revival beginning the first Sunday in August with an all-day service. Dr. Warner Brown, pastor of Mt. Zion Church, Steelton, Pa., will be the guest speaker.

Mrs. Mildred Watson Hollaman and son, of Philadelphia are spending their vacation here with her mother, Mrs. Delia Ellis.

Miss Marshall James and Mr. Luther Smith, of Lynchburg, were married Thursday evening at the home of Rev. and Mrs. Lawing.

Rev. and Mrs. N. R. Jordan entertained their daughters and their friends with an outdoor party at Camp Winonah last Friday evening. A gala affair was reported by all.

Virginia's Future Will Be Determined Next Tuesday!
The Choice is YOURS Between
The Sound Government Candidate--
Senator Battle
and
The C. I. O. Supported Candidate--
Mr. Miller

Senator Battle needs every possible vote if the CIO supported candidate is to be defeated.

The other two candidates in the race, Mr. Arnold and Mr. Edwards, can't win, BUT .... a vote for either is one half a vote for the CIO supported candidate, Mr. Miller.
The Roanoke World News sums the situation thusly:

Richmond, July 19th.- Two independent surveys of the current race for governor, one by the Richmond Times Dispatch and the other by the Roanoke Times, seem to add up, to quote the Roanoke newspaper, "to a neck-and-neck race between John S. Battle and Francis Pickins Miller."

Barton Morrin, Jr. political reporter for the Roanoke World News, writes that "Miller supporters here as elsewhere in the state are counting on Horace Edwards and Remmie Arnold to take away many votes that might normally be expected to go for Battle."

He continued, however, that Edwards is losing ground, and Arnold is not a major factor."

The results of the Times Dispatch survey by districts is as follows:
First District: "The race is between Battle and Miller with Battle having the edge.
Second District: Battle has "the edge in a doubtful fight."
Third District: (Richmond) "The hesitant prophet would give a slight edge to Miller."
Fourth District: Battle.
Fifth District: Uncertain.
Sixth District- Neck and neck race with Battle on the upgrade, due to the weakening of Edwards, who is deemed to have little chance.
Eighth District: Battle should get a good majority, with Miller second, and Edwards a poor third.
Ninth District: "Most labor leadeus in the district are working for Miller. They exercise considerable influence in populous Wise and Lee counties and may swing the balance there." The district, as a whole, is difficult to predict.
To sum, the race seems closs between Battle and Miller. Edwards seems to be losing ground rapidly and Battle is picking up most of the support which is leaving Edwards. Arnold is not a factor.

(Note: The 7th District apparantly was omitted from the Times Dispatch survey.

'The primary, however, may be decided by a few thousand - if not by a few hundred - votes"!

The Miller forces are revelling in this split of the more or less conservative vote because they know that only through such a division of the enemy's forces can they hope to win. That is the reason, for example that Miller does not feel it necessary to be frank with an answer to Battle's challenge concerning the State right-to-work and anti-strike in public utilities laws.
